# TRAINING PROGRAMME

At the Sprecher Training Center we offer training courses on basic and applied topics in the field of energy automation.

These courses take place either as a lecture or as a workshop in which the knowledge gained is directly applied. You can choose from standard courses and customised training courses.

## GENERAL TECHNICAL EDUCATION/TRAINING

- Basic technical training for automation engineers
  - in the energy sector
  - in the field of electrical power engineering for energy systems in the energy sector
- Trainings on important standards for energy automation

## PRODUCT-SPECIFIC TRAINING

- SPRECON-E Automation and Protection Platform
- SPRECON-V Visualisation

## INDIVIDUAL WORKSHOPS

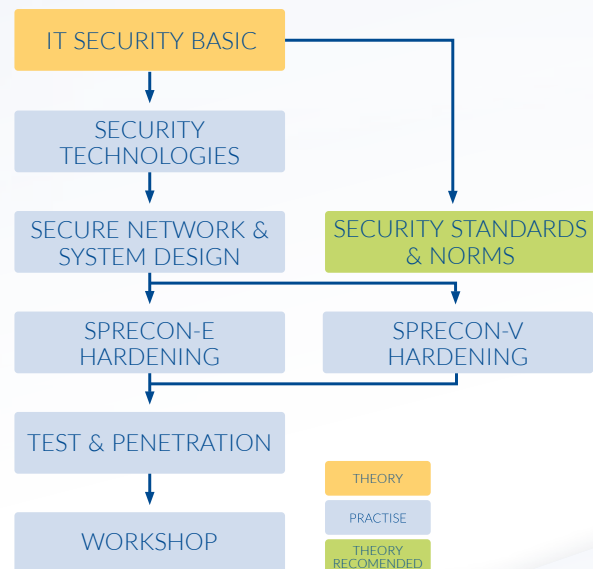

- Together, we determine the exact content of your workshop based on our training and your projects.

## IT SECURITY

In addition to the proven seminars “IT Security Basic” and “SPRECON-E Hardening”, we offer the following additional seminars:

- SPRECON-V460 Hardening
- Secure network & system design
- Security standards & norms such as ISO 27001, IEC 62443, security process
- Test methods, tools & best practice

When it comes to IT security, you can attend a wide range of training courses at our Training Center. In order to also offer you the view of an independent IT security company, we have been cooperating with LIMES SECURITY since 2018. The company primarily provides advice in the area of “IT security standards & norms” as well as in testing & penetration training.

# CERTIFICATION

In order to be able to check and confirm the theoretical and practical knowledge acquired in the various training levels, you can have yourself certified directly at the Sprecher Training Center.

## WHY CERTIFY?

- Qualifying knowledge of SPRECON products
- Improvement in the use of SPRECON devices
- Increase in productivity
- Reduction of maintenance efforts

The certification programme offers several opportunities for improvement:

### SCME – SPRECHER CERTIFIED MAINTENANCE ENGINEER

You can carry out the maintenance and repair of SPRECON automation systems independently as well as perform engineering tasks under instruction.

### SCSE – SPRECHER CERTIFIED SYSTEM ENGINEER

You are able to perform engineering tasks of SPRECON automation systems independently.

### SCSP – SPRECHER CERTIFIED SYSTEM PROFESSIONAL

You perform complex automation tasks independently. In addition, you have sufficient knowledge to evaluate any SPRECON automation systems and to act as project coach.

### SCTR – SPRECHER CERTIFIED TRAINER

You can provide expertise, using the methods and the didactic concept of the Sprecher Training Center, to third parties.
